

Tourism Management System

1. Project Overview

Aja Tourism Corporation (ATC) Tourism Management System is a full-stack web application designed to provide tourism package listings, Hyderabad location-based tours, transport booking, accommodation selection, online payments, user verification, document uploads, and a complete admin dashboard to manage users, bookings, and packages.

This document covers all functional, non-functional, technical, workflow, and data requirements in real-time industry format.

2. Project Scope

- User Registration, Login, OTP authentication
- Aadhar & passport photo upload for verification
- Hyderabad tourism locations & package listings
- Advance booking system with remaining payment before trip
- Payment gateway (UPI/cards/netbanking)
- Transport booking (cab allocation)
- Food & accommodation plans
- Support & helpdesk module
- Feedback & rating system
- Full admin dashboard
- Document verification workflow
- Notifications (SMS/Email)

3. User Roles

1. Guest User – Can browse packages & locations
2. Registered User / Traveler – Can book packages, upload documents
3. Admin – Full control of packages, bookings, payments
4. Support Agent – Handles user tickets
5. Transport Partner – Optional (cab assignments)

Aja Tourism Corporation (ATC)

4. Key Functional Requirements

➤ User Registration & Authentication

- Email/Phone + password login
- OTP option for verification
- During signup, user must upload:
 - Aadhar card (PDF or image)
 - Passport-size photograph
- Admin verification or automated eKYC
- Profile section with edit fields

➤ Home & Tourism Browsing

- Featured destinations
- Seasonal recommendations
- Search bar with filters (location, price, duration, rating)

➤ Locations Module (Hyderabad)

- List of all 20 attractions such as Charminar, Golconda, Ramoji Film City, etc.
- Filters by:
 - Area
 - Distance
 - Rating
 - Popularity
- Each location page includes:
 - Photos
 - Description
 - Best time to visit
 - Map (Google Maps embed)

Aja Tourism Corporation (ATC)

➤ Tourism Packages Management

Each package must include:

- Title & description
- Category (heritage, food tour, adventure, entertainment)
- Duration (hours or days)
- Pricing (per person)
- Images & gallery
- Availability calendar
- Itinerary details
- Inclusions & exclusions
- Add-ons (guide, photographer, VIP entry)
- Cancellation policy
- Vehicle/transport included or optional
- Capacity limits

Sample Packages (Realistic Pricing)

- Heritage Hyderabad – ₹2,999
- Golconda + Lake Experience – ₹4,999
- Royal Hyderabad – ₹7,499
- Ramoji Film City – ₹2,400 / ₹3,999 with transport
- Adventure & Entertainment – ₹5,999
- All Hyderabad 3 Days Combo – ₹49,999

Aja Tourism Corporation (ATC)

➤ Food & Accommodation

- User can select:
 - Meal plans (Veg/Non-veg)
 - Hotel category (2-star, 3-star, Premium)
- Admin can add hotel partners
- Hotel availability management

➤ Transport Module (Cab Booking)

Transport Types:

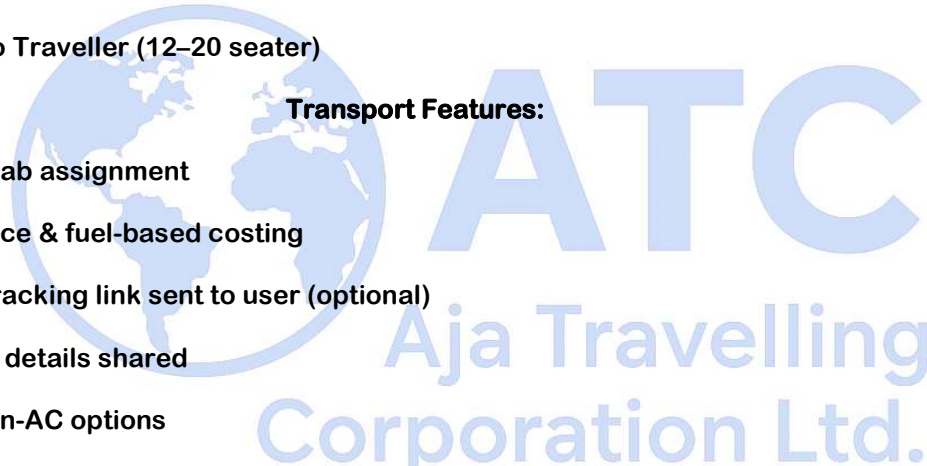

- Sedan (4-seater)
- SUV (7-seater)
- Tempo Traveller (12–20 seater)

Transport Features:

- Auto cab assignment
- Distance & fuel-based costing
- GPS tracking link sent to user (optional)
- Driver details shared
- AC/Non-AC options

Transport Workflow:

1. User chooses package
2. System suggests cab type based on people count
3. Admin assigns cab & driver
4. Transport partner gets notification

Aja Tourism Corporation (ATC)

➤ Booking & Payment Module

Booking Flow:

1. Select package
2. Select date & add-ons
3. Advance payment (30%–50%) required
4. Booking created
5. Remaining payment captured 2 days before trip

Payment Gateway:

- UPI
- Netbanking
- Debit/Credit cards
- Wallets

Automatic Actions:

- Auto-reminder SMS/email before 48 hours
- Auto-cancel if advance payment not paid in time
- Auto invoice generation

➤ User Support Module

- FAQ
- Live chat (3rd-party integration)
- Raise ticket (query, issue, refund request)
- Emergency contact number

Aja Tourism Corporation (ATC)

➤ Feedback & Rating Module

- Users rate after trip
- Add comment & upload photos
- Admin moderates reviews

➤ Admin Dashboard

Admin can manage:

- Users
- Locations
- Packages
- Bookings
- Transport (cabs, drivers)
- Hotels & meal plans
- Payments
- Reports (daily, weekly, monthly revenue)
- Notifications
- Audit logs

5. Non-Functional Requirements

Security

- Encrypt Aadhar documents using AES-256
- Force HTTPS
- Role-based access control (RBAC)
- Audit trail for document access
- Mask Aadhar numbers

Aja Tourism Corporation (ATC)

Performance

- Page load under 2 seconds
- Bookings API < 500ms

Scalability

- Load-balanced backend
- Separate services for booking, payment, packages

Availability

- 99.5% uptime for booking/payment endpoints

Localization

- English + Telugu support

Compliance

- Follow UIDAI document handling guidelines
- Secure data retention policy

6. Core

Users (id, name, email, phone, aadhar_doc, photo, role, status)

Locations (id, name, description, area, images, map_coordinates)

Packages (id, title, price, itinerary, inclusions, duration, images, capacity)

Hotels & Meals (id, name, type, partner_id, price)

Feedback (id, user_id, booking_id, rating, comment)

Audit Logs (id, action, admin_id, timestamp)

Aja Tourism Corporation (ATC)

Complete Workflow Summary

Signup-Verification Workflow

User → Upload Aadhar & Photo → Admin Checks → Account Activated

Booking Workflow

Search → Select Package → Choose Date → Add Meal/Hotel → Pay Advance → Booking Confirmed

Transport Workflow

User Booked → System Recommends Cab → Admin Assigns → Driver Details Shared

Remaining Payment Workflow

48-hour Reminder → User Pays → Invoice Generated

Feedback Workflow

Trip completed → Auto message → User submits rating → Admin moderates

8. Acceptance Criteria

- User must upload Aadhar & photo
- Admin can verify user documents
- Packages show availability and pricing correctly
- Booking fails if capacity is full
- Advance payment is mandatory
- Auto-confirmation emails & SMS must be triggered
- Remaining payment reminder sent 48 hours before trip
- Transport assignment must match number of travelers
- Feedback cannot be edited by users
